IMPORTANT

- Do not try to open

- Do not place near water

- Clean with a soft, dry cloth

- Don't cover the lens or vents

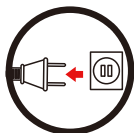

- Place it in horizontal position

- Place it in ventilated places

- Don't clean with chemical

- Disconnect when not in use

- Don't look directly to the light

HIGHLIGHTS

1. With this portable home theater projector, you can enjoy movies, sports, videos, pictures and more, like if you were watching a 120 inches dynamic image.
2. Plug your DVD or Blu-ray in one of the two available HDMI Digital inputs or send video from your computer via VGA port. You can use the AV input to plug another video player.
3. You can connect your USB Memory to the projector for your Multimedia Files.
4. The Portable home theater projector delivers clear images in low light conditions; the audio can be played through the built in speaker, but if you need more audio power output, you can connect an external speaker or audio system using the 3.5mm connector. It is very light weight and small size with respect to the home theater projector market, it is different from other brands. LED light source can be used above 30,000 hours life so you can carry on with the fun everywhere. Remote control included.

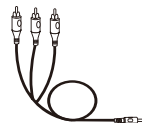

Note:

Projector uses long-life LED light source. It is the most suitable for home theater market. Video playback should not be in bright light environments. We do not recommend the projector for Word or spreadsheet. This is not a professional education projector, video playback is the main function.
